

“From bale density to auto wire-tying,
THESE BALERS ARE TOP PERFORMERS
– and I’d say the same about the company!”

“Balers are critical to our operation. They have to be reliable and affordable. When we purchased our first baler from American Baler over 12 years ago, we knew we had a winner. We’ve purchased two more since then.”

“American Baler provided us with more than great balers – they deliver great service, too. They have always been there to meet all our configuration needs.”

As one of the largest multi-stream recycling centers in the East, Cogle’s Recycling bales over 60,000 tons of OCC/paper every year: corrugated cardboard, newspaper, waste paper, commercial and residential. Matt Cogle needs balers he can rely on for performance and a baler company he can rely on for service.

WE’RE ON THE JOB WITH YOU, 24/7!

The American Baler service desk is ready with live operators to take calls ‘round the clock. It’s their job to help you keep your operation up and running with the industry’s maximum bale densities and lowest cost-per-bale.

When our customers need us, we’re there. That’s the American way!
