

With more than **25,000 TONS** of OCC to **PROCESS EVERY YEAR**, Midland Davis found the best way to handle a baling jam is the American way!

*“Our baler from American Baler feeds so easily, there’s never a jam. Even oversize, stiff and bulky corrugated boxes feed easily and jam-free. That’s important for productivity and from an operator safety standpoint. Our American Baler does the work of two previous balers... and the bales are perfect every time!”*

**“PAPER PROFITS” ARE MONEY IN THE BANK**

**FOR MIDLAND DAVIS.** With more than 100 years of experience in the scrap metal business, they understand how to turn new material streams into new opportunities for their recycling business. American Baler is their choice for the uptime, throughput and safety they need to keep their OCC moving smoothly. Customers like Mitch and Marty Davis know from experience that the American way is the right way to squeeze more profit into every bale with:

- highest bale densities
- low energy costs
- less labor

...plus proven dependability on-the-job, day in and day out.

**CORRUGATED BOXES, ALUMINUM CANS, PLASTIC BOTTLES** – you name it, and American Baler will handle it. With our full range of single- and two-ram high speed auto-tie balers, including wide mouth models for bulky inputs, American Baler can help you fit your operation with the right baler for maximum efficiency and throughput for any mix of non-ferrous materials.

We’re ready to work with you 24/7 to squeeze more profit into every bale. That’s the American way!
