

After 250,000 tons baled in four years, Nortech knows how to **SQUEEZE MORE PROFIT** from recycling operations – the American way!

“We depend heavily on our American baler. We run two shifts, five days a week, serving 1/4 million households and commercial customers. This baler takes everything we throw at it – without fail! So we purchased from American Baler again. The balers are simply production workhorses that just keep going.”

Aluminum cans, plastic bottles, OCC – you name it, and American Baler will handle it. With our full range of single- and two-ram high speed auto-tie baler models and custom features, American Baler can help you fit your operation with the right baler for maximum efficiency and throughput for any mix of non-ferrous materials. Customers like Rena Sims know from experience that the American way is the right way to squeeze more profit into every bale with:

- highest bale densities
- low energy costs
- less labor

...plus proven dependability on-the-job, day in and day out.

WE'RE ON THE JOB WITH YOU, 24/7!

The American Baler service desk is ready with live operators to take calls 'round the clock. It's their job to help you keep your operation up and running with the industry's maximum bale densities and lowest cost-per-bale. |

When our customers need us, we're there.

That's the American way!
